

*Found only in Spain, it is certainly the most sought after European trophy.*

### SOUTHEASTERN IBEX:

The horns resemble the configuration of Mouflons, with a strong curve growing aggressively backwards from the skull.  
**Season:** October through April.

DUKE OF WÜRTTEMBERG

MR. ESTEBAN LARRAGAIN

### RONDA IBEX:

It is the smallest of the four. The growing of the horn is straight and vertical.  
**Season:** October through April.

MR. TOM LIPAR

MR. HUBERT THUMMLER
